Mixed Reality
Environment

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable.

If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text.

Objectives and Ambition

What is the problem? It is widely considered that the experience of music and art performance is the most impactful in a dedicated location such as a concert hall due to all the ways that a physically shared experience offers immersion due to acoustics, liveness, and interaction with other people. Engagement with the arts, including music, dance, theatre, and visual arts, can have a range of positive effects on physical and mental health, including reducing stress and anxiety, improving immune system function, and reducing hospital stays and need for medication1. However, access to the many benefits of musical experience can be limited due to various reasons: **1 /** the geographic location of the venue, **2 /** personal limitations in access, **3 /** limitation on the schedule of the concerts and performances, **4 /** cost of the experience. Due to these limitations the effort and cost of getting access to the concerts and performances override additional value the participant would get from the experiences.
