XTREME

Mixed Reality Environment
for Immersive Experience
of Art and Culture

We blend the **virtual** and **physical**, allowing people to come together for cultural experiences in **mixed-reality.**

XTREME is an EU funded research project developing a mixed reality solution for arts and culture.

The project **consortium**

The project is conducted in close collaboration between 14 different partners. Together we will explore different alternatives to the traditional way of accessing music and art experiences.
